

Tongjie Zhang

+86 156.0189.5805 | tong.jie.zhang@hsbc.com.hk

Education

University of Dayton (Dayton, Ohio)

- Master in Computer Science, 2012-2014

Qingdao Technological University (China)

- Bachelor in MIS (Management Information Systems), 2008 – 2012

Work Experience

Infosys Limited - Systems Engineer, 2014.12 – 2017.7 (Newark, CA)

- Designed and implemented a web interface for backend database in C# and jQuery/JavaScript
- Created python scripts with Robot Framework, Sikuli and Selenium to test existing software
- Front end web development

Chiwen Information Technology Co. Ltd. – DevOps Engineer, 2017.8 – 2017.12 (Shanghai, China)

- Developed an automated platform which can be used to collect server/application logs, track hardware status and deploy java applications automatically
- Created custom Nginx security modules with lua and redis
- Designed IT infrastructure with teammates and troubleshoot Linux application issues

HSBC (GBM Tooling Team) – Developer/Tooling Engineer, 2018.9 – current (Guangzhou, China)

- Created internal tools with Java/Clojure/Python/Node and setup infrastructure used by developers
- Tech support for internal IT infrastructure and systems
- Linux systems administration

Skills

- Web development: **JavaScript**, JQuery, Bootstrap, Bulma (CSS framework)
- Programming: **Java**, C, C++, Golang, **NodeJS**
- Scripting: **Shell**, **Python**
- **Linux/Unix**
- Cloud service: AWS, Azure, **GCP** (Compute Engine, Cloud Storage, Logging, Container Registry)
- Database: Postgres, PgBouncer, Oracle
- Infrastructure as code (IaC) Tools: **Ansible**, **Terraform**, Salt, Vagrant, Puppet

- Tooling: **Container**, KVM, Jenkins, Jira, Bitbucket, GitLab, Confluence, Nexus/Nexus IQ, TeamCity, Splunk, Grafana, Prometheus, HAProxy etc.

Languages

- Chinese (Mandarin)
- English

Projects

- **Ora2pg (contributor)**: Move Atlassian products (Jira/Confluence/Bitbucket) backend db from Oracle to Postgres
Keywords: Java, Postgres, Oracle, Threading, Connection Pooling, Query Optimization, Database Triggers, DB Migration, Data Type Conversion
URL: https://stash.hk.hsbc/projects/FXT/repos/oracle_to_pg/browse
- **Notificaiton API (contributor)**: API used to check CR status and take care of Email/Symphony/Confluence/Flash notificaiton
Keywords: Clojure, Notification
URL: <https://stash.hk.hsbc/projects/FXT/repos/bundle-scheduler/browse>
- **NoCI (contributor)**: Jenkins alternative. Internal CI/CD build server (Terraform/Maven/Rust/Ansible/Docker/Clojure/Golang/Node, etc.)
Keywords: CI/CD, Build Server, Python
URL: <https://stash.hk.hsbc/projects/FXT/repos/noci/browse>
- **Tooling status page**: monitor/track upcoming maintenance and haproxy service status
Keywords: NodeJS, Bootstrap, GSD API, HAProxy
- **Vulnerability scanner (server & client, contributor), Ticketeer**: Scan binaries from given path, check/report vulnerabilities (Backend: Nexus IQ) and track ticket status
Keywords: Java (client), NodeJS (server), Bootstrap, MongoDB, Nexus IQ, Jira
URL: <https://stash.hk.hsbc/projects/FXT/repos/clouseau-ticketeer/browse>
- **Scheduler (contributor)**: Scheduler to run some jobs periodically: gcp key rotation, jira reindex, notificaiton, gcp vm rebuild, etc.
Keywords: Scheduler, Python
- **Genesis & Utopia (contributor)**: an API driven application deployment tool to deploy apps into the machine on which it is running
Keywords: Docker, Python, CI/CD
URL: <https://stash.hk.hsbc/projects/FXT/repos/genesis/browse>
